

SOLVENTIS

WORLD CLASS CHEMICAL SOLUTIONS

Environmental Policy Statement

It is the policy of Solventis to meet and exceed customer and other relevant interested parties' expectations in all aspects relating to our development, distribution, manufacturing and sales operations and this extends to our environmental performance.

Solventis and all employees commit to:

- Comply with current environmental legislation, regulations and codes of practice including but not limited to The Environmental Protection Act 1990 and the Clean Air Act 1993 as well as selected additional voluntary schemes;
- Work together to maintain certification of ISO 14001;
- Ensure that the level of environmental risk is evaluated in all our operations and mitigated wherever possible;
- Monitor/measure environmental data for our own use and to report to interested parties with the aim of making improvements in all areas of impact including but not restricted to prevention of pollution, optimal energy and water use, waste disposal and carbon footprint;
- Use environmental and sustainable procurement and disposal of articles and services wherever practicably possible and promote this within the supply chain;
- Provide the right organisation & resources to ensure an effective environmental performance;
- Carry out regular training when onboarding and on an ongoing basis to ensure that staff at all levels are trained and engaged in environmental practices;
- Recognise and respect local communities and any environmental concerns (e.g., noise and light pollution) and take appropriate action to minimise these;
- Identify opportunities for improved environmental performance in all areas of the business and implement continual improvement
- Periodically review the policy and the effectiveness of the Integrated Management System to ensure it is fit for purpose.
